Gender & Enterprise Studies in Focus

Following its initial initiatives relating to Gender & Development, such as research and Entrepreneurship Development programs, the Institute plans to strengthen its Gender and Enterprise Program. The year 2022 marked the production of eight titles on Gender and Enterprise. Another set of new titles have been added during the current year. Copies are available from www.isedpublications.org.

As in 2022, the studies and other initiatives in the subject witnessed a broader framework of ‘Social and Solidarity Economy (SSE)’ wherein the role of women’s groups such as cooperatives and self-help groups are spotlighted.
