

## **Press Note for users of ISED Knowledge resources and Publications**

As a specialist institution with unique knowledge resources in the area of SMEs and Entrepreneurship at its command, the Institute is keen to make available such resources and publications for the larger interests of SME research, policy, and development practice. Publications of the institute are available with the United States Library Congress Network and leading universities and research institutes across the world.

While the purpose of ISED publications is essentially knowledge dissemination in pursuance of the Institute's vision and goal of "Sustainable development through Enterprise", their circulation is managed on 'not-for-profit' principles. However, it has come to our notice that many such titles have been commercially transacted, both online and in hard copy form, by some unscrupulous booksellers.

For the kind information of all uses of ISED knowledge resources and publications we hereby notify that:

1. ISED does not have any authorised agents or booksellers for its publications and other knowledge resources.
2. All such resources and publications are made available to genuine users directly by the Institute. Transactions in any other form, both purchase and sales, may be understood as infringement on the Institute's rights under Copyright Law.
3. Secondary sources, such as independent portals and library catalogues, are advised to register due credit to the Publisher, as INSTITUTE OF SMALL ENTERPRISES AND DEVELOPMENT, and not to any such (unauthorised) booksellers/agencies.
4. ISED Publications can be ordered, on-line ([www.isedpublications.org](http://www.isedpublications.org)) or directly, from the Publications Division of the Institute ( email: [publications@isedonline.org](mailto:publications@isedonline.org), or [seo@isedonline.org](mailto:seo@isedonline.org)).
